

## SEMA Attends The 2017 Offsite Construction Show at ExCel London

*This year's Offsite Construction Show at ExCel in London was a remarkable success for SEMA who were showcasing their timber construction, staircase and metal façade design software. Working with 3 machinery partners at the show many of the industry decision makers visited the SEMA Stand to discuss their future plans and requirements.*

Visitors to the exhibition took the opportunity to meet with the SEMA team and learn about the benefits of our fully integrated design software with CAD CAM interface which sends files directly to CNC cutting machinery and automated framing stations.

As well as David Williams and Sally Anne Grost from the UK Office Company CEO Alexander Neuss and International Business Development Manager Matthias Weidinger from the head office in Germany were on the stand to support the UK team and meet visitors. The SEMA Team also took the opportunity to meet with other exhibitors to discuss partnering and other business opportunities.

The Offsite Show was well attended, visitors also had the opportunity to join colleagues and industry leaders at the 8 workshops and 20 seminars during the two days as well as visiting the stands of the 75 plus exhibitors showcasing products and services. If you didn't get the opportunity to visit us at our stand this year we look forward to meeting up with you next year 20<sup>th</sup> – 21<sup>st</sup> November 2018 and ExCel, London.

SEMA provides software solutions and additional services in the fields of timber and stairs construction, as well as for the sheet metal work. As the world-leader in these sectors, the SEMA program is available in 11 languages and has been used successfully by more than 8,500 customers in 54 languages for over 30 years. Each year, an average of 15 % of the company's turnover is re-invested into the further development of the software solutions so that SEMA customers can always benefit from new and innovative solutions.
